CIMIS

The California Irrigation Management Information System (CIMIS) is a program unit in the Water Use and Efficiency Branch, Division of Statewide Integrated Water Management, California Department of Water Resources (DWR) that manages a network of over 145 automated weather stations in California. CIMIS was developed in 1982 by DWR and the University of California, Davis (UC Davis). It was designed to assist irrigators in managing their water resources more efficiently. Efficient use of water resources benefits Californians by saving water, energy, and money. Visit the website @ www.cimis.water.ca.gov.

REMINDER

Clear Creek C.S.D. would like to remind customers to please call the District Office any time water service needs to be turned off or on inside the meter box. This will ensure that District valves will only be operated by District employees, thus protecting the customer from charges incurred if valves are broken or meters are damaged. A field staff member is on-call during the weekends and in the evenings.

Please call 357-2121.
